Change in Configuration of De Gaspé St. West: The City Asks Drivers to Comply with Signage During the Work

Châteauguay, November 4, 2019 – The work to rehabilitate Gaspé St. West is continuing and the City would like to remind residents of the importance of complying with the traffic prohibition in force in the sector. Despite the presence of panels prohibiting access to work areas, many drivers are taking this street, which constitutes a major security issue for both residents and workers on the site.

One-way traffic

Traffic flow on Gaspé St. West, between Tremblay Street and Maple Boulevard, is now one way heading toward Maple.

This change in configuration aims to reduce the traffic volume on this very busy residential artery and the neighbouring streets.

Two-way traffic is only permitted on the last 20 metres of the street, which is the section adjacent to Maple Blvd., to facilitate access to the financial institution located there.

The City is not able to determine when the work will be completed. The official end of work will be celebrated by a symbolic event for local residents at an appropriate time. In the meantime, we need more co-operation from everyone and encourage residents to comply with the signage in place so that the street can be made accessible as soon as possible.
